RE: No Action Assurance Extension for the Landing Roofs on Gasoline Storage Vessels in Texas Related to Hurricane Harvey

Dear Director Hyde:

This letter is in response to the need to extend the No Action Assurance (NAA) dated September 15, 2017, to meet the ongoing fuel shortage caused by the disruption of Hurricane Harvey. Due to infrastructure damages to the refineries and the petroleum distribution network, Texas refineries are unable to operate at full capacities resulting in a gasoline shortage within Texas and potentially causing more widespread gasoline shortages. We understand that there is still a demand for the residual gasoline in the storage tanks that cannot be distributed due to regulatory constraints regarding tank roof landing.

In light of the continued emergency in Texas, the EPA will extend the September 15, 2017, discretion not to pursue enforcement for violations of the New Source Performance Standards (NSPS), Subparts Ka, at 60.112a (a)(1) and (a)(2), and Kb, at 60.112b (a)(1)(i) and (a)(2)(iii). This will allow facilities to continue to land the roofs of the storage tanks and continue distributing the remaining product to consumers. The extension of the September 15, 2017, NAA terminates September 29, 2017 at 11:59 PM CDT. EPA reserves the right to revoke or modify the NAA if the EPA believes that such action is necessary to protect public health and the environment. This NAA does not apply to any other federal requirements that may apply to regulated activities at these facilities other than those listed above.

Nothing in this exercise of enforcement discretion relieves any person of the obligation under law, if any, to report emissions from the operation of equipment covered by this action. Pursuant to this NAA, the EPA will not enforce violations of the NSPS applicable to these facilities in Texas, subject to the following conditions:

1. The owner/operator notifies EPA within 48 hours of each instance of roof landing pursuant to this NAA (by email as provided below);

2. Owners/operators make best efforts to minimize roof landings;
3. Owners/operators exercise good air pollution control practices as required by any and all applicable standards;
4. Owners/operators minimize, to the greatest extent practicable, roof landings near residential areas; and
5. Owners/operators comply with all conditions imposed by State or local authorities on these emergency operations.

EPA reserves the right to amend or revoke this NAA at any time.

The notifications identified above should be sent via email to Steve Thompson, at [thompson.steve@epa.gov](mailto:thompson.steve@epa.gov).

The extension of the September 15, 2017, NAA is in the public interest. Through today's NAA extension, the EPA is continuing its commitment to address the very difficult circumstances caused by Hurricane Harvey. Nothing in this NAA extension is intended to over-ride Texas state or local authorities.

If you have any questions please contact Phillip A. Brooks, at 202-564-0652 or [brooks.phillip@epa.gov](mailto:brooks.phillip@epa.gov).

Sincerely,

Lawrence Starfield  
Acting Assistant Administrator
